DETAILED ACTION

Status of Claims

1. Claims 236, 238 and 240-256 are pending and are restricted.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 236, 238 and 240-251, drawn to a composition comprising a first component...a second component at least one member derived from rosemary...

Group II, claim(s) 252-256, drawn to a method of treating or inhibiting a pathological condition in a mammal associated with tissue-specific activation of inflammation.... Comprising a first component ... a second component consisting of rosemary...

3. The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the composition of

is not novel, see WO-991/61038 which describes the compounds as active agents in a nutritional substituent. Therefore, a holding of lack of unity amongst the inventions of Groups I and II is proper.

This application contains claims directed to more than one species of the generic invention.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted. Specifically, applicant is required to elect for example if Group I is elected to elect a single species derived from the hops and a single species derived from rosemary and triterpene.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143). Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by

a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to SHIRLEY V. GEMBEH whose telephone number is (571)272-8504. The examiner can normally be reached on 8:30 -5:00, Monday- Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, MICHAEL HARTLEY can be reached on 571-272-0616. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
